

# BUCKET FILLING ACTIVITY

## Materials:

- Cups
- Construction paper
- Markers
- Stickers
- Pipe cleaners

## Activity Instructions:

Depending on age, you may want to create the “buckets” ahead of time.

In order to make the buckets:

- Take a plastic solo cup
- Put 2 hole punches in the cup (at the top and on opposite sides).
- Once you have the hole punches, take a pipe cleaner and place one end in each of the hole punches and loop it over the top of the cup (this will make the handle for the bucket)

Once the buckets are created, provide each person with a bucket and have them write their names on their bucket and decorate them in a way that expresses their personality. Once they are done writing on their bucket, they can write or draw kind and positive notes to their peers and place them in their buckets.
